

microlife[®]

A partner for people. For life.

Why Microlife

- Microlife is a world market leader in the development and production of medical diagnostic equipment - for use at home and in health facilities since 1981.
- Cutting edge technologies certified from credible societies all over the world.
- highest quality, precision and reliability.
- Define quality standards that are as high as they are for professional applications.
- Completed Healthcare portfolio satisfying needs of all segments.
- Strong supply chain management
- Dedicated sales ,customer service and maintenance team.

Stroke risk detection

High accuracy in Atrial Fibrillation (AF) detection for stroke prevention

MAM technology

3 readings in a row as recommended by doctors

PAD technology

For heart arrhythmia detection

Inflation Mode Technology

Quick and gentle measurement during inflation

Conical cuff 22-42cm

Suitable for all common arm sizes

Blood Pressure

BPM Innovations

4

MAM TECHNOLOGY

Analysis of 3 successive blood pressure measurements in less than 3 minutes.

AFIB TECHNOLOGY

The most reliable detection of atrial fibrillation (AF) during blood pressure measurements at home.

PAD TECHNOLOGY

The PAD technology automatically detects heart arrhythmias during a blood pressure measurement.

CUFF FIT CHECK

Gentle+ ensures optimal speed and pressure control for comfortable measurements

PC CONNECTIONS

port for PC connection with the user-friendly BP Analyzer software

Microlife Breast Pumps

BC 100 Soft - Manual breast pump

- The Microlife manual breast pump is an excellent choice for mothers who express their breast milk occasionally
- The compact design is easy to assemble, lightweight and ultra-silent (only 135 g)
- No battery or power is required as they are operated individually by hand
- Ergonomic designed manual pump handle with two pumping levels ensures gentle and comfortable usage anywhere

BC 100 Soft - Manual breast pump

28

Product highlights:

- Ultra-quiet - Allows for discreet pumping anywhere

- Compact and portable design - Ideal for on the go

- Safe and hygienic - Accessories are washable and disinfectable

0%
BPA

- Milk bottle (completely free of BPA) and teat are ideal for newborns

0+
months

- Silicon teat with double anti-colic valve ensures maximum protection from colic - the teat always remains full of milk to prevent air ingestion

BC 100 Soft

- Fully equipped:
 - 180ml breast milk bottle
 - Soft silicon cushion (standard medium size)
 - Bottle cap
 - Bottle stand
 - Two matching screw plugs for Philips AVENT and NUK
 - Naturally shaped silicone teat for easy feeding
 - Easy storage and transportation with carrying bag

BC 200 Comfy - Single electric breast pump

- Designed to mimic the baby's natural feeding action
- 2-phase vacuum technology simulates natural drinking for gentle and comfortable use
- Ideal for mothers who want to comfortably express their breast milk every day
- Powered by batteries or mains adapter to allow comfortable pumping anywhere
- **Innovative feature:**
Suitable for two-sided pumping - Upgradable with silicone tube and a second breast milk bottle for dual pump mode

BC 200 Comfy

Product highlights:

- 10 different stimulation modes for highest comfort

- 10 pumping modes for optimal expressing

- Memory function for personalised usage

- Large display with timer to easily track stimulation and pumping time usage

- Illuminated display which is easy to read day and night

- Powered by batteries or mains adapter

- Battery level indicator (batteries running time on level 10 approx. 60 minutes)

BC 200 Comfy

- Fully equipped:
 - 180ml breast milk bottle with bottle stand
 - Soft silicon cushion (standard medium size)
 - Bottle cap
 - Silicone tube
 - Two matching screw plugs for Philips AVENT and NUK
 - Naturally shaped silicone teat for easy feeding
 - Medical power adapter
